

Maintenance Free Water Valves

Intermatic's Maintenance Free Water Valves have been designed to provide reliable control of water flow to pools, spas, solar collectors, cleaners and water features. These 2-way and 3-way valves have excellent flow characteristics while maintaining backpressure. Manufactured with Intermatic's high quality standards, the PAV Series Water Valves offer long maintenance free performance giving you and your customers piece of mind.

New for 2005

Standard features include:

- *Teflon-coated diverter requires no lubrication and ensures maintenance free performance*
- *Maximum body pressure 150 psi*
- *Maximum working pressure 35 psi*
- *Innovative field adjustable stop ensures precise valve positioning*
- *Resistant to chemical and temperature fluctuations*
- *1-1/2" valve fits 1-1/2" and 2" plumbing, 2" valve fits 2" and 2-1/2" plumbing*
- *Available in standard PVC and high temperature CPVC*

For maximum convenience in pool/spa automation, PAV Series water valves can be used in conjunction with Intermatic PE24VA valve actuators.

PVC WATER VALVES

PAV215
1-1/2" 2-Way PVC

PAV220
2" 2-Way PVC

PAV315
1-1/2" 3-Way PVC

PAV320
2" 3-Way PVC

CPVC WATER VALVES

PAV215C
1-1/2" 2-Way CPVC

PAV220C
2" 2-Way CPVC

PAV315C
1-1/2" 3-Way CPVC

PAV320C
2" 3-Way CPVC
